

# ADELEYE IFATUROTI

## FULL STACK REACT DEVELOPER

### EXPERIENCE

#### React Developer | BrainStation

MAY - AUGUST 2022, LONDON, UK

- Creating react app, clearing the default components and data.
- Creating Functional and Class Components.
- Using lifecycle method componentDidMount, componentDidUpdate, componentWillUnmount to run functions when these conditions happened as well as conditional clauses in componentDidUpdate to prevent endless loops in class component.
- Passing props in components, using basic Hooks such as useState and useEffect to get data and set them replacing component lifecycle. Example getting data from an api then storing setState.
- Using useContext to set global settings such as the theme of a website to certain colors.
- Creating components through lists and setting unique key values.

#### Senior Assistant | NHS

FEB 2017 - MAY 2022, LONDON, UK

- Streamlined the core administrative work processes, making them more efficient and less lengthy, then created workflow diagrams for the team this improved our team efficiency by 50%.

#### 2nd Line IT Support | Pan Ocean Oil

2011 - SEPT 2013, LAGOS, NIGERIA

- During a company-wide move when access points and racks were wrongly labelled, I suggested we document the correct access points. This suggestion saved the company a week of downtime when the external vendors returned to correct the error.

### PROJECTS

#### Web Developer || BrainStation

- eRed Book: Electronic record-keeping web application to replace red book used for record-keeping for new babies and parents. Technologies used: React, Axios, Express, MySQL, Knexjs, Node, RestAPI, Recharts, Sass and JWT.
